- GUI Specification Critique: PDF | LaTeX gzipped tarball
- Specification checklists: gzipped tarball
- System performability: PDF
- Inspection Report: PDF

Helpful docs/software

- CVS Information (project listings and basic setup and usage)
- Weekly management report, how to edit your parts and get your changes to the rest of the group.
- Putty, a Win32 SSH client
- vi reference

Templates

(It is suggested you checkout the management report, generic document, or system spec templates from cvs rather than using these tarballs, but these *should* be current.)

- Webpage template (name it webpage.shtml for it to actually be parsed by the webserver)
- Management Report template
- Generic Document template
- System Specification template
