

CHRISTOPHER C. FROST

chris@frostnet.net <http://www.frostnet.net/chris/>

Education

University of California, Los Angeles

Ph.D. in Computer Science, *expected Summer 2010*

Masters in Computer Science, *2006*

Thesis: Improved Data Storage Consistency: Patches and Short-Circuit Shadow Paging

Advisor: Eddie Kohler

GPA: 3.9

University of Virginia, School of Engineering and Applied Science

Bachelor of Science in Computer Science, *2004*

Bachelor of Arts in Mathematics, *2004*

Thesis: Amorphous Shape Mapping

Advisor: David Evans

CS GPA: 3.9, Math GPA: 3.2, Overall GPA: 3.4

Research Experience

Phase Change Memory File System Design, MICROSOFT RESEARCH AND UCLA *2008–Present*

Redesigning file system software and cache hardware design to take advantage phase change memory to provide significantly stronger reliability guarantees and better performance.

Libprefetch, UCLA *2008–Present*

Exploring today's disk performance properties and developing new file system prefetching interfaces and techniques to dramatically increase non-sequential disk read performance.

Featherstitch, UCLA *2005–Present*

Developing new file system abstractions that allow applications to manipulate stable storage more efficiently, safely, and easily. Developed the patch disk change abstraction for file system implementations and fast, scalable in-kernel graph analysis and manipulation algorithms.

JPred, UCLA *2005–2006*

Devised the first modular and typesafe type system that permits dynamic dispatch on object types in the face of multiple inheritance.

Amorphous Shape Mapping, UVA *2003–2004*

Developed and analyzed a method of mapping shapes using an amorphous computer, Undergraduate Thesis.

Cracker Barrel Game Complexity, UVA *Spring 2003*

Proved a variant of the cracker barrel game to be NP-Complete.

Amorphous Shape Growing, MIT PROJECT ON MATHEMATICS AND COMPUTATION *Summer 2002*

Developed an amorphous shape forming method, exploring node layout via cell growth and gradient exudation.

Work Experience

VMWARE, VMFS GROUP

MTS Intern with Jinyuan Li, Mayank Rawat, and Murali Vilayannur

Summer 2009

Designed and developed new distributed data movement capabilities for VMFS ESX clusters to improve performance and load balancing. Contributed to the design of new VMFS space saving technologies.

MICROSOFT RESEARCH, OPERATING SYSTEMS GROUP

Intern with Ed Nightingale and Jeremy Condit

Summer 2008

Developed new file system consistency protocol design principles for phase change memory that yield both significantly faster and safer file systems than traditional consistency protocols.

GOOGLE, ADSENSE AND JAVA INFRASTRUCTURE GROUPS

Engineer Intern

Summer 2005

Designed and developed a declarative RPC representation to replace AdSense's existing hand-coded RPC system. Extended internal AdSense RPC systems to permit further automation of ad analysis.

APPIAN, TECHNOLOGY

Technology Intern

Summer 2004

As a team with three other interns, developed the first two business processes built on Appian Enterprise's BPM engine, from process specification to deployment. To implement our processes I developed Appian Enterprise's initial process loop construct and initial process model migration tool; both later supported the Army's Knowledge Online website, the world's largest intranet.

MICROSOFT, WINCE CORE OS GROUP

Software Design Engineer

Summer 2003

Co-designed and developed Windows CE's UPnP AV Framework, a lightweight toolkit that simplifies UPnP AV DCP implementations. Contributed to the Windows CE C++ STL implementation.

DYNETICS, MISSILE SYSTEMS DEPARTMENT

Engineer Intern (DoD Secret Clearance)

Summers 2000 and 2001, Winter Breaks 2000-2001 and 2001-2002

Developed a joystick input option for the simulation architecture JMASS, a graphical frontend that streamlined and further automated geometrical testing of solid propellant missiles, a graphical communication link analyzer that enabled engineers to assess flight tests more quickly and thoroughly, software that helped determine the feasibility of lower-frequency wind sampling for Tactical Unmanned Air Vehicle testing. Designed updates to the missile simulation system BADGER. Ported Solaris and Irix programs to Solaris, Linux, and Cygwin.

US ARMY, REDSTONE ARSENAL, AMRDEC, MISSILE GUIDANCE DIRECTORATE

SEAP Apprentice

Summer 1999

Designed the target recognition training backend for the directorate's memory-less target recognition system.

Teaching Experience

UNIVERSITY OF CALIFORNIA, LOS ANGELES, COMPUTER SCIENCE DEPARTMENT

Teaching Assistant, Operating Systems (CS 111)

Fall 2005, Winter 2006, Spring 2006

Developed the synchronization lab and enhanced the course's existing shell, file system, and event labs. Developed automated grading systems for the course's lab. Led weekly discussions and helped students during office hours and via email. Assisted with midterm and final design. Authored and delivered one lecture.

THE UNIVERSITY OF VIRGINIA, COMPUTER SCIENCE DEPARTMENT

Teaching Assistant, Software Development Methods (CS 201)

Fall 2001

Helped students during office hours, oversaw lab sections, and graded labs.

Publications

Journal Publications

- [1] *Expressive and Modular Predicate Dispatch for Java*. Millstein, Frost, Ryder, and Warth. In Transactions on Programming Languages and Systems (TOPLAS), February 2009 31(2)

Refereed Conference Publications

- [2] *Better I/O Through Byte-Addressable, Persistent Memory*. Condit, Nightingale, Frost, Ipek, Burger, Lee, and Coetzee. In Proceedings of the 22nd Symposium on Operating Systems Proceedings (SOSP), Big Sky, MT, October 2009
- [3] *Reducing Seek Overhead with Application-Directed Prefetching*. VanDeBogart, Frost, and Kohler. In Proceedings of the 2009 USENIX Annual Technical Conference (USENIX), San Diego, CA, June 2009
- [4] *Generalized File System Dependencies*. Frost, Mammarella, Kohler, de los Reyes, Hovsepian, Matsuoka, and Zhang. In Proceedings of the 21st Symposium on Operating Systems Proceedings (SOSP), Stevenson, WA, October 2007 (Audience choice awardee.)

Refereed Workshop Publications

- [5] *Modularly Typesafe Interface Dispatch in JPred*. Frost and Millstein. In Proceedings of the 2006 International Workshop on Foundations and Developments of Object-Oriented Languages (FOOL/WOOD), Charleston, SC, January 2006
- [6] *The KudOS Architecture for File Systems*. de los Reyes, Frost, Kohler, Mammarella, and Zhang. In The Work in Progress Session at the 20th Symposium on Operating Systems Principles (SOSP), Brighton, UK, October 2005

Theses

- [7] *Amorphous Shape Mapping*. Undergraduate Thesis, University of Virginia, May 2004.

Newsletters

- [8] *Pancakes, Puzzles, and Polynomials: Cracking the Cracker Barrel*. Frost, Peck, Evans. In The Special Interest Group on Algorithms and Computation Theory (SIGACT) News, Volume 35, Number 1, March 2004

Technical Reports

- [9] *Featherweight JPred*. Frost and Millstein. Technical Report CSD-TR-050038, UCLA Computer Science Department, October 2005
- [10] *Pancakes, Puzzles, and Polynomials: Cracking the Cracker Barrel*. Frost, Peck, Evans. Technical Report CS-2004-04, UVa Computer Science, March 2004

Patents

- [11] *Hardware and Operating Systems Support for Persistent Memory On A Memory Bus*. Microsoft. Filed July 2009.

Talks

- “Better I/O Through Byte-Addressable, Persistent Memory”, conference talk at SOSP, *October 2009*
- “Generalized File System Dependencies”, conference talk at SOSP, *October 2007*
- “Modularly Typesafe Interface Dispatch in JPred”, workshop talk at FOOL/WOOD, *January 2006*
- “Cracking the Cracker Barrel Game”, at UVa’s Undergraduate Research and Design Symposium, *Spring 2003*
- “The Intersection of Two Planes is a Line”, invited, but declined, to talk at the Mathematics Association of America, *2003 Meeting*
- “Shape Formation Through Cell Growth and Gradient Exudation”, at MIT AI Lab, *Summer 2002* and UVa CS, *Fall 2002*.
- “Software Development Tools”, at UVa ACM-Microsoft User Group Tech Talk, *Fall 2003*

Open Source Software

- **Scord** Reduce the disk space used by a subversion working copy. <http://scord.sf.net/>
- **Mswatch** Efficiently keeps two IMAP mailstores in sync. <http://mswatch.sf.net/>
- **Featherstitch** Patch-based storage system. <http://featherstitch.cs.ucla.edu/>
- **Libprefetch** Faster nonsequential file access. <http://libprefetch.cs.ucla.edu/>
- **JPred** Compiler for practical predicate dispatch for Java. <http://www.cs.ucla.edu/~todd/research/jpred.html>

Computing Experience

Operating Systems

Unix (with os-specific knowledge in Linux, ESX, Irix, and Cygwin), Windows and WindowsCE, NewtonOS, and JOS

Programming Languages

Proficient: C, C++, Java

Working Knowledge: Bash, Python, Perl, x86, OCaml, Common LISP, Cg, VHDL, Lightning, Matlab, SQL, and L^AT_EX

Awards

- SOSP audience choice, *2007*
- UCLA Computer Science Departmental Fellowship, *2004–2006*
- Placed 1st at UCLA ACM's 1st and 2nd Programming Competitions, *November 2004, February 2005*
- Microsoft “Shipped” Award for Windows CE's UPnP Audio/Video Framework, Windows CE 5.0, *July 2004*
- Placed 11th, 11th, and 20th of 150 teams at ACM's Mid-Atlantic Programming Contest, *Fall 2001, 2002, 2003*
Member of UVa's team at ACM's 2003 World Finals, the top 70 of the 24,000 teams world wide, *Spring 2003*
- Placed 6th out of 146 teams at COMAP's International Interdisciplinary Contest in Modeling (MCM), *Spring 2003*
- Winner of the annual CS 340 Robot Games, *Spring 2002*
- “Most Outrageous Project” in CS 333, a JIT for the BF language, *Fall 2001*
- Placed 1st in Computer Science among Redstone Arsenal SEAP participants and in the top six at nationals among all SEAP participants for *Implementation of a Relational Database as an Aid to Automatic Target Recognition, 1999*
- Eagle Scout, *1998*

Activities

- UCLA chapter of the Association for Computing Machinery, Graduate Liaison, *2006–Spring 2009*
- UVa chapter of the Association for Computing Machinery, Vice-Chair *2003*, Secretary *2001* and *2002*
- Honor Educator, *2001–2004*
- Founding member of UVa's Student Pugwash chapter, *2002–2004*
- Engineering School Fourth Year Board Member, *2003–2004*
- Theta Tau, a national, professional, coeducational engineering fraternity, *2000–2004*
- UVa Engineering Student Council, EWeek Co-chair *Spring 2002*, Co-First Year Representative *1st Year*
- Linux Users of North Alabama (LUNA), *1997–Present*
Founding member, original author of the LUNA FAQ, and past installfest organizer
- Amateur Radio Operator (Technician), *1993–Present*
